Application of Artificial Intelligence (AI) in the Chemical/Pharmaceutical Industry

20th NOVEMBER 2018 | Tuesday | 7:00 PM

@ Bodacious Bar & Bistro (70 Biopolis Street)

The Singapore National Institute of Chemistry (Membership Committee) and the Royal Society of Chemistry Singapore Local Section have co-organized a panel discussion. The speakers in the panel discussion will share about the current developments and future trends of AI in the chemical and pharmaceutical industry as well as how chemists can contribute to this growing industry. This event aims to bring together people who are already in the field of AI and those who are interested in entering the field of AI.

Wan Ting Poh (Moderator)

Director
Data Science at Allianz SE
Managing Director
Girls in Tech Singapore

Wan Ting is a data geek and AI enthusiast with experience spanning med-, ad- and insur-tech. She is currently leading and developing a team of data scientists in innovating data science solutions focused on delivering competitive advantages, superior insights and/or operating efficiencies that translates to business impact. A strong believer that technology can drive the world to be a better place, Wan Ting recognizes the importance of diversity in this digital revolution and strives towards the day where everyone feels empowered in STEM.

Norman Ng

Assistant Director
SGInnovate

Norman is a passionate venture-builder with 13 years of proven track record in venture building, partnership and community acquisition, and strategic communications. He has led global networking and partnership acquisition of deep-technology advisors, mentors and technical talents to grow over 20 portfolio companies in artificial intelligence, IoT; Medtech and Biotech companies. He is supporting venture building efforts through intangible asset/intellectual property (IP) management consulting for over 40 deep-technology companies, de-risking early stage investments and positioning the IP strategy for a venture capital (VC) group and its portfolio.

Jason Tamara Widjaja

Associate Director
Data Science (AI Products)
Singapore IT Hub, MSD International GmbH

Jason believes in working towards a better world through data. A multi-disciplinary professional, he leads a high performing and quirky in-house data science team in MSD's Global Data Science Competency where individuality is valued and nurtured. Jason and his team specialize in machine learning, AI and data products, working closely with organizations from all sizes.

Jason spent half his career in Australia before relocating back to Singapore in 2016 to build the local ecosystem. He advocates practical deep tech and ethical deployment of AI at scale, and is also Quora's top writer on Analytics.

Joydeep Sarkar

Chief Analytics Officer
Holmusk

Joydeep is the Chief Analytics Officer at Holmusk. With a background in biomedical engineering, he specializes in predictive modeling and simulation and has over 10 years of experience in healthcare analytics. Prior to joining Holmusk, Joydeep worked with pharmaceutical companies, major providers and medical device companies, developing advanced analytics solutions and was the technical lead of a team of biomedical engineers inside the PwC USA's healthcare analytics practice. He continues to work in healthcare research and has an impressive track record of publications and presentations.
