

Junior Analytical Scientist

About Kerry:

Kerry offers the industry's largest portfolio of Taste & Nutrition Systems and Functional Ingredients & Actives, serving the Global Food, Beverage and Pharmaceutical industries. We work with the world's top Retailers and Manufacturing companies to produce some of the best private-label products and tailored Food & Beverage solutions on the market. We also work with the leading Food Service chains helping to deliver appetising, relevant and innovative custom solutions, using our expertise in new product development, production and commercialisation.

Founded in 1972 in Co. Kerry, Ireland, the Kerry Group has annualised sales in excess of €5 billion and supply over 15,000 food ingredients and flavour products to customers in more than 140 countries worldwide. We have established over 100 manufacturing sites, operate in over 30 countries, and employ 24,000 people worldwide.

Kerry has been present in the Asia-Pacific region since 1997 and has grown its business to become a supplier of choice for our regional and local customers. Kerry APAC employs nearly 3,500 talented people across the APAC region. Being a truly global company, our employees in Asia-Pacific have opportunities to develop their careers in a global environment, with training, career development and international opportunities across the global Kerry footprint.

Our Values: Commitment | Teamwork | Excellence | Entrepreneurial | Value Creation
