

One Research Assistant position available from Jan 2017 in the laboratory of A/P Fan Wai Yip at NUS chemistry department:

We seek a highly-driven research assistant who has experience and is able to carry out inorganic synthesis and characterization well. He or she will be responsible for preparing transition metal compounds and use them for catalytic applications. The candidate must hold at least a BSc degree in chemistry and has some track record in carrying out experimental research in inorganic chemistry independently. The appointment will be initially for one year with possibility for extension depending on research progress and performance.
