

Tenure Track Position in Environmental Chemistry

The Department of Chemistry at National University of Singapore (NUS) is seeking outstanding applicants for tenure-track positions in Environmental Chemistry at Assistant or Associate Professor ranks.

Successful candidates would be expected to

- have a Ph.D. in chemistry or chemical engineering and at least two years of postdoctoral experience, preferably in the fields of waste remediation, CO₂ capture & storage, membrane technology, and biomass conversion. Those with additionally a strong background in analytical chemistry are especially encouraged to apply.
- possess strong track record of publications in top notch journals
- establish an internationally recognized research program
- have a commitment to teaching excellence at the undergraduate and graduate levels
- be competitive for external research grants.

We offer competitive remuneration, research start-up funding and also help our faculty members compete for external grants.

NUS is a comprehensive university that has been consistently ranked highly among the international universities by the Times Higher Education Supplement (London) and QS World University Ranking. The department of Chemistry at NUS is ranked 7th in the world according to QS subject rankings.

Singapore's pro-research, pro-education and pro-talent environment will suit scientists who are seeking to live and work in a progressive and dynamic environment.

Interested candidates should submit

- CV with list of publications
- Teaching philosophy
- Research proposal
