Open Position for Lab technologist in Organic Electronics

We are looking for a lab technologist position in the Organic Nano Device Lab (ONDL) at Department of Chemistry at National University of Singapore. The scope of work includes (i) Design and synthesis of monomers and their corresponding conjugated semiconductor polymers and conjugated polyelectrolytes suitable for organic transistors, light-emitting diodes, solar cells and also sensors applications. (ii) Synthesis of additives such as photocrosslinker for enabling organic heterostructure devices. (iii) lab safety.

Requirements:

The candidate shall have a diploma in Applied Chemistry, Applied Science, Chemical Engineering or related field and have laboratory skills in organic synthesis and general analytical techniques.

If you would like to join our dynamic team, please email Prof Lay-Lay Chua (chmcll@nus.edu.sg) including your curriculum vitae.

Position is immediately available.
